(NOT measured IceCube points)
10^{-7}
10^{-8}
10^{-9}
10^{-10}
10^{-11}
$E_\nu^2 \Phi$ [GeV cm^{-2} s^{-1} sr^{-1}]
Maxwell–Jüttner $\propto e^{-E/T_\nu}$ ($T_\nu = 15$ TeV)
power law $E^{-\Gamma}$, $\Gamma = 2.5$
Kaniadakis $\exp_\kappa(-E/E_0)$, $\kappa = 0.40$ ($-1/\kappa = -2.48$)
